

... sailing for everyone!

DSA Lift Equipment Sources

DSA Elkhorn Lift is a portable hydraulic lift made specifically for disabled sailing programs and used by DSA programs across North America. This lift can be safely used with people weighing up to 400 lbs. A lift socket will be manufactured to fit your specific dock. Jim will fax you a form that you will complete, detailing the structure of your dock. You can order one or more of these sockets to install in your docks.

Product: DSA Elkhorn Lift

Product Part Number: #28502-02
